ADVANCED SERVICES

The Hantle 1700w can display 8 custom graphic screens. These can be loaded directly at the ATM using a SD memory card, or uploaded remotely using the TranRMS monitoring software.

TranRMS is a monitoring application which runs on your desktop PC and allows you to monitor your network of ATMs. Loaded with useful functions like downloading electronic journals, updating software and custom graphics as well as cash management and statistics. TranRMS can also send you alerts via cell phone and email in the event the machine goes out of service. TranRMS helps increase your ATMs' uptime and lowers your operational costs.
